## Abdominal Imaging lectures

### Notes:

- All Lectures on Mondays 4pm
- Based on feedback from last year, we are doing away with the two monthly sections
- Some faculty members have expressed an interest on giving lectures/ conferences on other days( PR, RR,EG). Those dates will be coordinated by Shane/ Donna.
- From feedback again, a mixture of case based and didactic teaching is best.
- Journal clubs- if you choose to do it please send a copy to Shane and Vicki
- Shane may ask some of you to do extra resident lectures during residency interviews. While encouraged, that is at your discretion.
- Board reviews are at your convenience.
- By coincidence / interest there was some amount of duplication in our lectures last year ( eg focal liver lesions, HCC, RCC). It would be great if some benign disease including inflammatory/ infective stuff is shown.
- Prior to major conferences ( RSNA/ ARRS) we may organize extra lectures.
